MEASURES FOR CYBERSECURITY

Jhulelal Institute of Technology, Nagpur has a next generation firewall (NGFW) provides capabilities beyond that of a stateful network firewall, technology. A stateful firewall is a network security device that filters incoming and outgoing network traffic based upon Internet Protocol (IP) port and IP addresses. By intelligently inspecting the payload of some packets, new connection requests can be associated with existing legitimate connections. A next generation firewall adds additional features such as application control, integrated intrusion prevention (IPS) and often more advanced threat prevention capabilities like sandboxing.
