15.20 Teaching Learning Process

The teaching and learning process in engineering colleges utilizes a variety of methods, including experiential learning, participative learning, and problem-solving methodologies. All academic activities adhere to the established annual and academic calendar.

1. Curriculum Design and Delivery:

- Outcome-Based Education (OBE): We follow OBE frameworks, where the curriculum is designed based on clearly defined learning outcomes and program educational objectives. This ensures that students acquire the necessary skills and knowledge to meet industry demands.
- Course Structure: Our programs usually consist of core courses, elective courses, multidisciplinary subjects and practicals. Core courses provide a strong foundation in fundamental engineering principles, while electives allow students to specialize in areas of interest. Laboratory / practical sessions provide hands-on experience and practical application of theoretical concepts.
- Teaching Methods: A variety of teaching methods are employed, including lectures, tutorials, seminars, group discussions, and project-based learning. The choice of method often depends on the nature of the subject matter and the learning objectives.
- Technology Integration: Modern engineering colleges leverage technology to enhance the learning experience. This includes the Swayam courses, online resources, virtual labs, and many more.
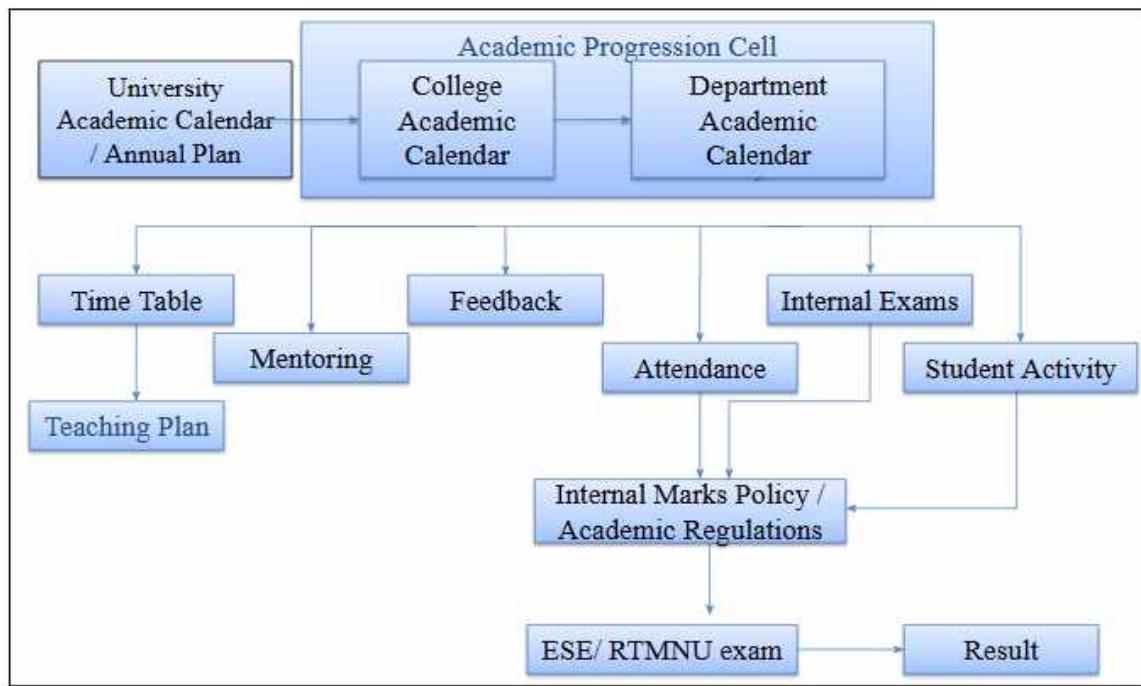

2. Assessment and Evaluation:

- Continuous Assessment: We typically employ a system of continuous assessment, which includes regular TAE (assignments, quizzes, Open book tests) and Practical evaluations. This helps students track their progress and identify areas where they need to improve.
- Summative Assessment: In addition to continuous assessment, summative assessments, such as CAE / Unit Test and ESE / PUT, are conducted to evaluate students' overall understanding of the course material.

- Project Evaluation: Project work is an integral part of education, and students are evaluated based on their project reports, presentations, and demonstrations. We conduct PBL, Mini Project & Major Project.

3. Student Support and Development:

- Faculty Mentorship: Faculty members play a crucial role in mentoring students, providing academic guidance, and helping them with their career planning.
- Tutoring and Remedial Classes: We offer tutoring and remedial classes for students who need additional support in specific subjects.
- Career Counseling and Placement: Our colleges often have career counseling and placement cells that assist students with internships, job placements, and higher education opportunities.
- Extracurricular Activities: Students are encouraged to participate in extracurricular activities, such as technical clubs, student societies, and sports, to develop their leadership, teamwork, and communication skills.

4. Continuous Improvement:

- Feedback Mechanisms: We have feedback mechanisms to gather input from students, faculty, and other stakeholders on the teaching-learning process. This feedback is used to make necessary improvements in the curriculum, teaching methods, and assessment strategies.
- Faculty Development: Faculty members are encouraged to engage in continuous professional development to stay updated with the latest advancements in their fields and to enhance their teaching skills.
